Janus Platform

4C4D1.4

Solange Gueiros
Osaka – oct/2019

4cadia foundation - focused in Decentralized Finance web 3.0 projects. One of the projects is Janus Platform.

Solange Gueiros

- São Paulo - Brazil
- Blockchain Leader at 4Cadia
- Instructor at Blockchain Academy
- Teacher at MBA Blockchain course in FIAP

Janus Platform is a Blockchain system

Tools to publish, store and explore the Web 3.0

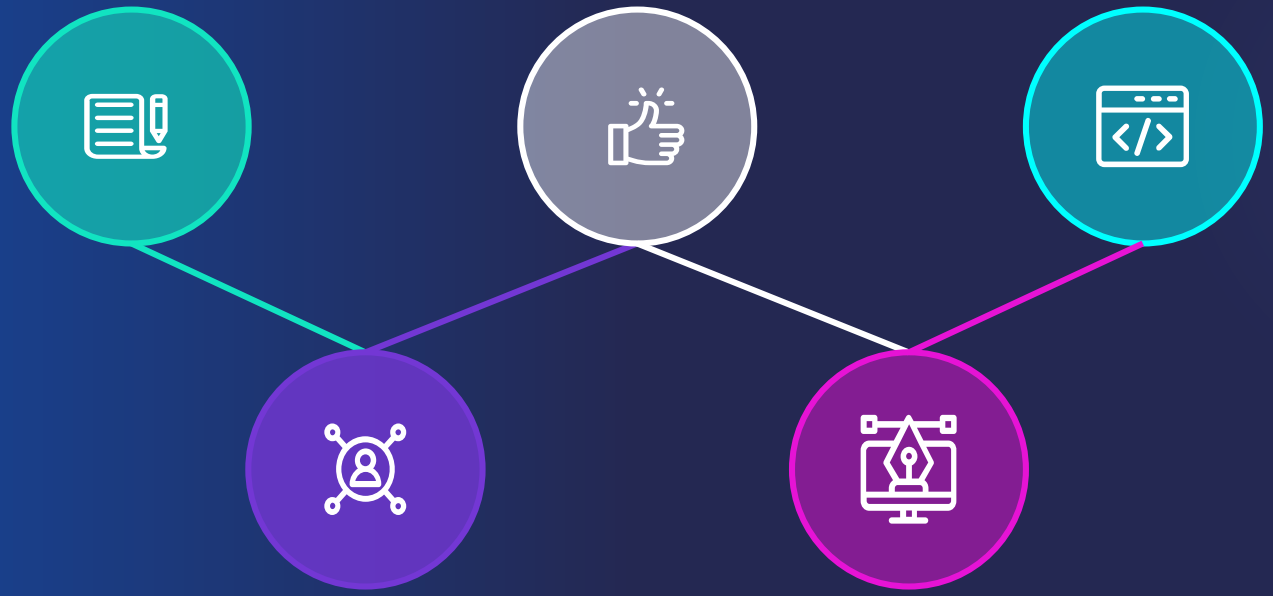
IPFS - WHY and HOW

INTEGRATION

In our experience, to integrate the project to IPFS was easy and viable as the Docs were very helpful

DOCUMENTATION

After analyzing some similar technologies we found IPFS Documentation the most complete and trustable



HOST

IPFS was used as a Web Server making it possible to distribute our DAPPs as well

DECENTRALIZED

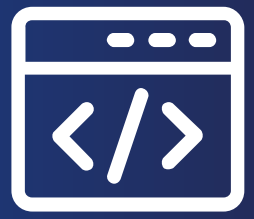
We were looking for a total decentralized and distributed technology as long as a trustable network with some applications already being used

FILE STORAGE

We managed to use IPFS as a File Storage for any kind of web application

Indexer

Ethereum Smart Contracts



JANUSNDXR

Janus web app

JANUSNDXR (CLI)

- It is a Command Line Interface (CLI)
- Focused on the technical users
- Make the process of deploy fast and easy using the terminal

JANUSNDXR - CLI

```
Usage: index [options]

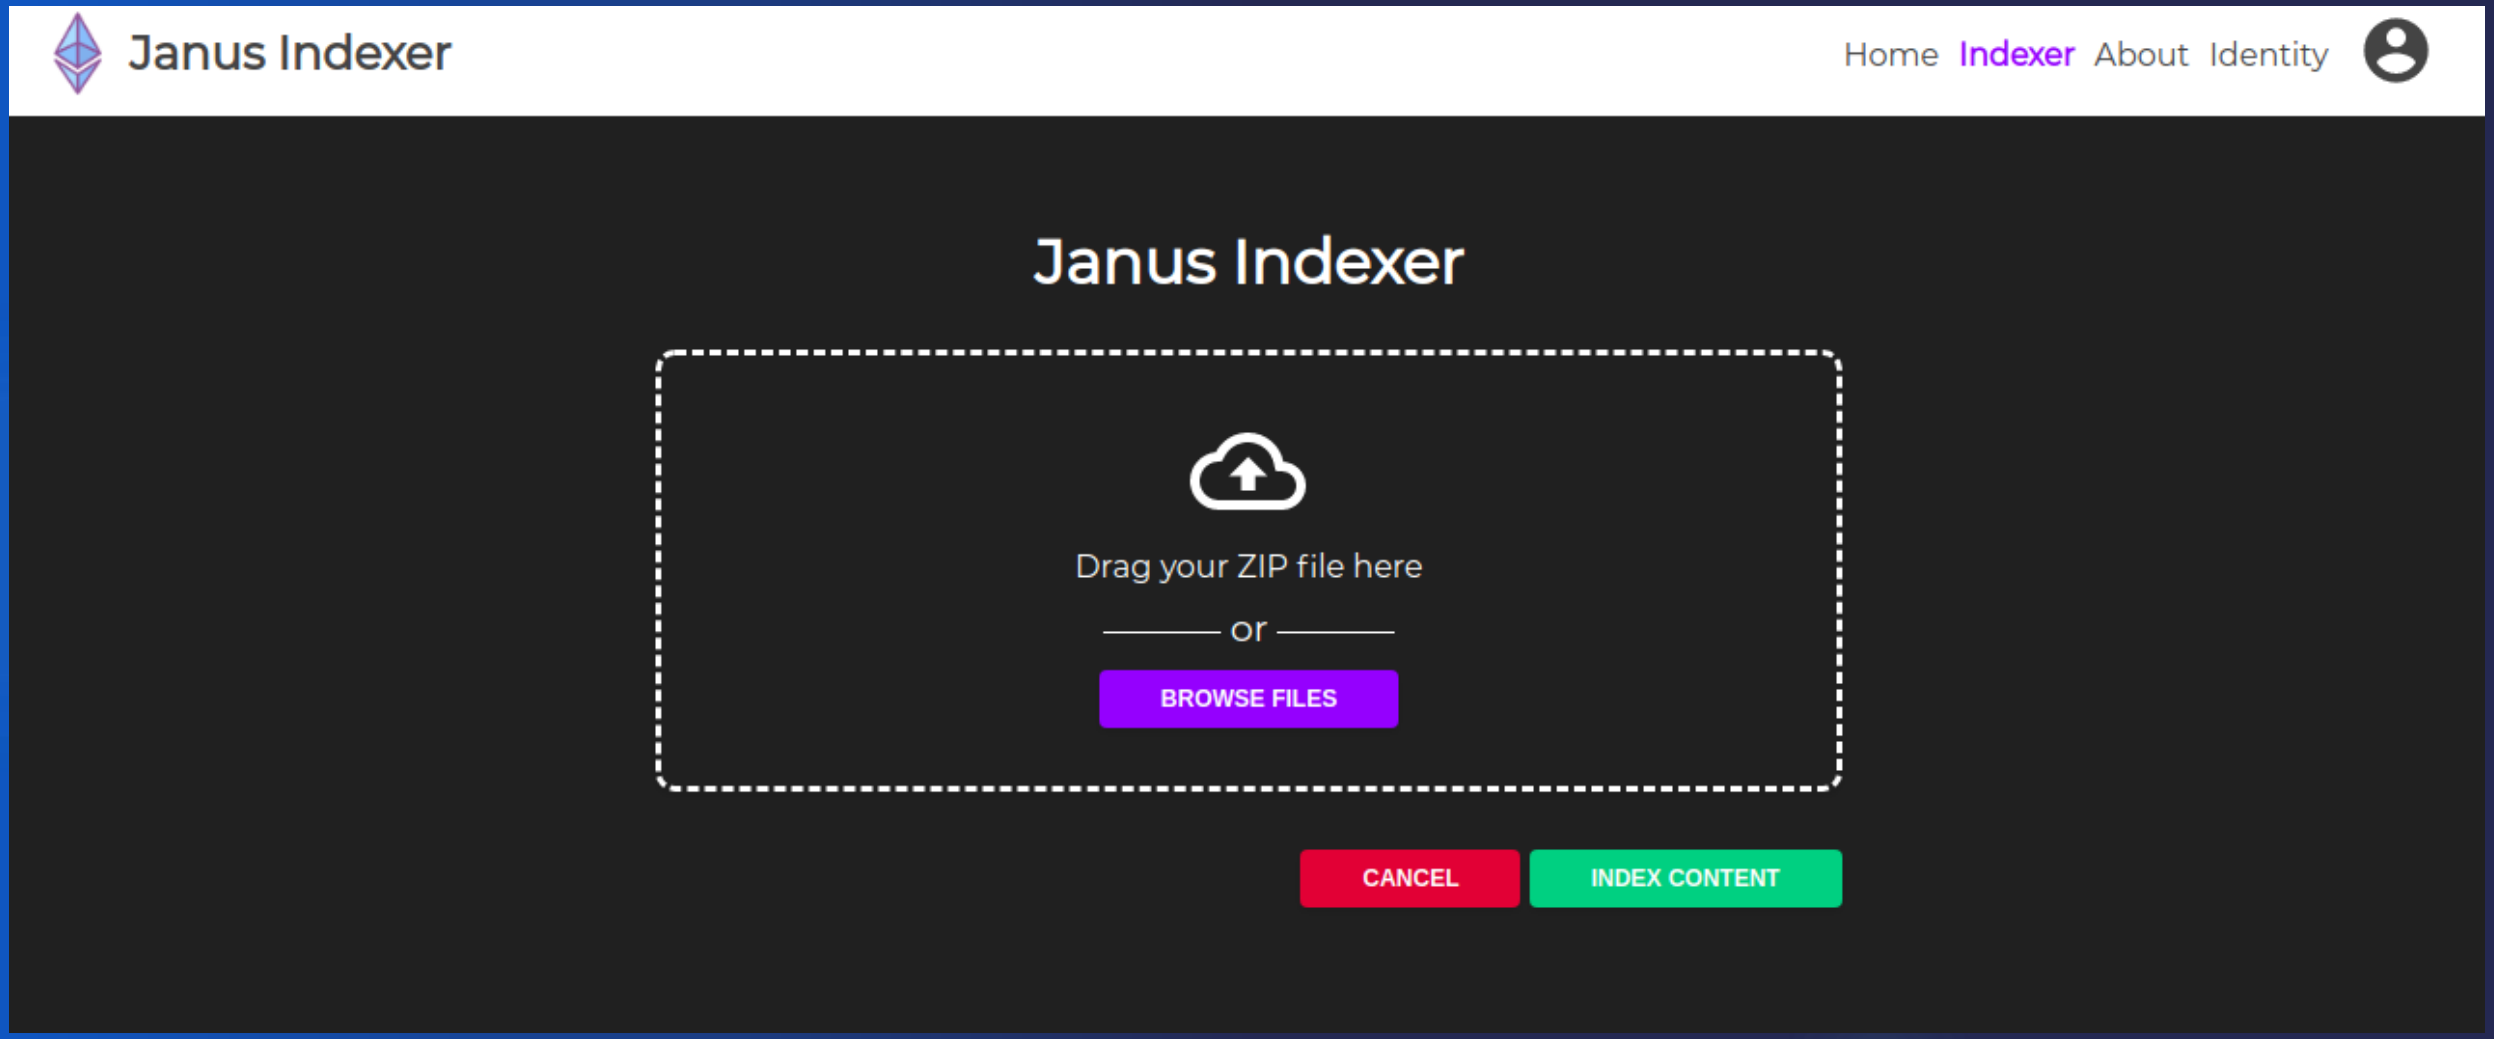
Janus CLI - Web3 Indexer

Options:
  -V, --version           output the version number
  -C, --content <item>    Content to be indexed
  -T, --type <item>       Content type,must be "hash","file" or "folder"
  -A, --address <item>    Your ETH adress
  -h, --help              output usage information
```

Janus indexer (web app)

- dAPP
- Easy to upload and index Web 3.0 content
- Communicate directly with the blockchain
- No command lines or technical knowledgement
- Intuitive
- Friendly interface

Janus indexer



Janus Searcher

Janus Searcher

- Explore the Web 3.0
- Search keywords
- Find all pages indexed
- User friendly
